REVISION OF ANNUAL CAP FOR THE PROCUREMENT FRAMEWORK AGREEMENT

Reference is made to the Prospectus in relation to, among other things, the PIA Procurement Framework Agreement entered into between the Company and PIA on October 17, 2025, pursuant to which the Group may procure certain customized intelligent manufacturing equipment and related digital software research and development services from PIA Connected Persons from time to time for the period from the Listing Date (i.e. 6 November, 2025) up to December 31, 2027.

The Board expects that the original annual cap for the transactions under the PIA Procurement Framework Agreement for the year 2026 will not be sufficient to meet the business needs of the Group. Therefore, on March 30, 2026, the Board resolved to revise the annual cap for the transactions under the PIA Procurement Framework Agreement for the year 2026 from RMB221.9 million to RMB400.4 million.

Pricing and Other Terms

There is no change or alteration to the terms of the PIA Procurement Framework Agreement, and the principal terms (including the pricing terms) are set out in the section headed "Procurement of Equipment and Services from PIA Connected Persons" in the Prospectus.

Historical Transaction Amounts

For the year ended December 31, 2025, the transaction amount incurred in relation to the procurement from PIA was approximately RMB343.6 million, representing approximately 96% of the annual cap for the transactions under the PIA Procurement Framework Agreement for the year 2025.

Revised Annual Cap

The Board resolved to revise the annual cap for the transactions under the PIA Procurement Framework Agreement for the year 2026 from RMB221.9 million to RMB400.4 million.

In arriving at the above revised annual cap, the Directors have considered the following factors:

(i) the historical annual transaction amounts for the procurement of equipment and services by the Group from PIA Connected Persons under the PIA Procurement Framework Agreement for the years 2023, 2024 and 2025 were RMB134.1 million, RMB331.3 million and RMB343.6 million, respectively;

(ii) the existing executed contracts or order arrangements between the Group and PIA Connected Persons. According to the progress of the assembly lines, the acceptance amount is expected to be recognized in 2026; and

(iii) the acceptance progress of customized assembly lines has a certain impact on the timing of the transaction recognition, and the Group's original amount estimates were primarily based on the then planned business, as well as on the confirmed assembly line requirements to be procured from PIA and the acceptance progress. In view of the Group's latest business arrangements and the increase in customer demand, combined with the actual execution schedule of the Company's orders in the year 2026, the Group will launch certain new projects in the year 2026, which will require the construction of new assembly lines, and it is expected that the demand for intelligent manufacturing equipment will increase accordingly. Taking into account the business demands already placed by the Group to PIA and the potential business demands under planning, the above increment is expected to be concentrated and reflected in the year 2026.

REASONS FOR AND BENEFITS OF REVISING THE ANNUAL CAP FOR THE TRANSACTIONS

As mentioned in the Prospectus, PIA is a leading provider of industrial equipment and automated manufacturing solutions, possessing extensive delivery experience and expertise in the field of intelligent manufacturing equipment for the automotive industry. PIA Connected Persons have a long-term cooperative experience with the Group, which enables them to be familiar with the Group's business needs, quality standards and operational requirements in relation to production and assembly lines. Based on historical cooperation experience, the Group considers that PIA Connected Persons can provide high-quality and efficient production and assembly solutions, effectively and stably meeting the business needs of the Group. Considering the comprehensive advantages formed by the continuous cooperation between the Group and PIA Connected Persons over the years, as well as the further business needs and schedule arrangements of the Group for the year 2026, the Board expects that the original annual cap for the transactions under the PIA Procurement Framework Agreement for the year 2026 will not be sufficient to meet the business needs of the Group. Therefore, the Board resolved to increase the original annual cap to the revised annual cap for the transactions. The Group will also continue to implement the market-based price comparison mechanism to ensure that the relevant procurement prices and terms are no less favorable than those provided by independent third parties.

The Directors (including the independent non-executive Directors) are of the view that the transactions under the PIA Procurement Framework Agreement and the revised annual cap for the transactions are entered into in the ordinary and usual course of business of the Group on normal commercial terms, and are fair and reasonable and in the overall interests of the Group and the shareholders of the Company.

As Mr. Wang Jianfeng, Ms. Li Junyu, Mr. Zhu Xuesong and Mr. Zhou Xingyou hold relevant positions in PIA and its controlling shareholder, Joyson Group, they have abstained from voting on the Board resolution approving the revised annual cap for the transactions. Save as disclosed above, none of the other Directors has a material interest in the adoption of the revised annual cap for the transactions.

INFORMATION ON THE PARTIES
